A COVERING LETTER

Title: Spatial Redistributions of Regional Economic Activity in Central Java
(Direct Error Correction Model Causality Approach)

The Basic Findings Of The Paper: This manuscript focuses on a paradigm shift from macro to regional (residency as a form of decomposition) related to the relationship of inequality and economic growth based on the concept of the Myrdall theory of spread effects and backwash effects and the Kuznet hypothesis. The development of theil entropy index and direct error correction causality approach model are used to answer the focus in this study.
